

Yandex.Disk

Welcome to Yandex.Disk

Welcome aboard Yandex.Disk! This file contains information about the service and lets you know what to expect once you take off.

Yandex.Disk is a free file storage service accessible from any internet-enabled device.

Yandex.Disk is there when you need it:

1. Install the Windows or Mac OS X app and upload files by simply dragging them to the Yandex.Disk folder.
2. Send Yandex.Disk files to your friends and colleagues using the Yandex.Mail app for iOS and Android.
3. Manage your documents from any corner of the globe: you can access all your files from the “Files” tab of the Yandex.Mail website.

Yandex.Disk Application

Launch the application once the installation process is complete.

In Windows, you can find Yandex.Disk in:

1. Your taskbar (notification area).
 2. The Start menu.
 3. My Computer or Explorer under “Favorites”.
- To make Yandex.Disk even more accessible, drag the Disk icon from the popup window to the notification area of your taskbar:

Mac OS X:

Yandex.Disk is located in your menu bar, the Applications folder and the Favorites section in the Finder window.

Click on the Yandex.Disk window in your taskbar (Windows) or menu bar (Mac) to:

- Quickly access your Yandex.Disk folder or Disk web interface,
- See which files have been synced or modified recently,
- View your current Disk sync status and remaining sync time,
- Change your Yandex.Disk settings.

The Yandex.Disk icon includes the following status indicators.

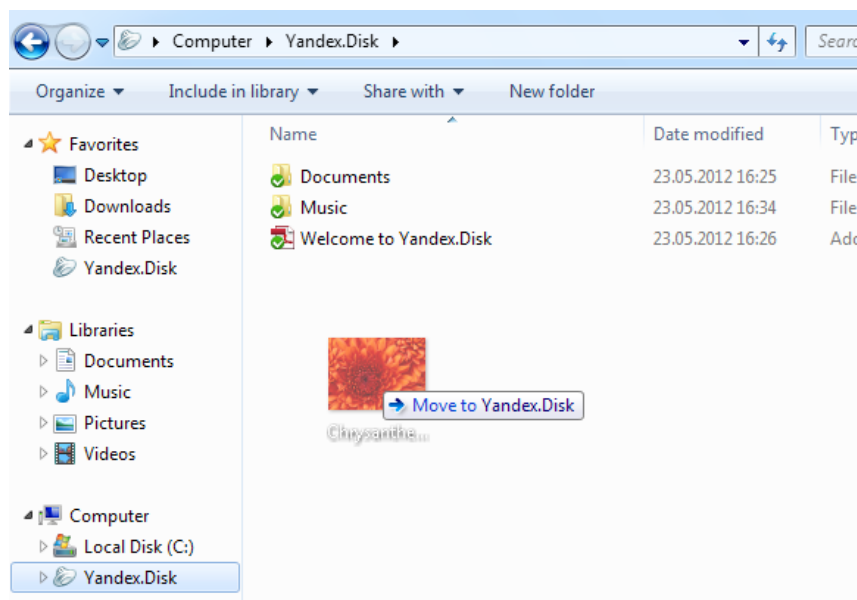

All files are stored and synced.

Files uploading or syncing.

Managing Disk Files

The “Yandex.Disk” folder on your computer is just like any other folder except it’s connected to our cloud service. Anything you put in this folder will be automatically uploaded to Yandex.Disk. You’ll then be able to access your files from any other computer or smartphone with the Yandex.Disk application installed or in the “Files” tab of the Yandex.Mail web interface.

For example, if you install Yandex.Disk on your office computer, you’ll be able to access all the files you place in the Yandex.Disk folder back at home. All these files can also be accessed from the Yandex.Mail website by clicking on the “Files” tab.

If you need to access your files when you’re not at your computer, get the Yandex.Mail mobile app for iOS and Android.

Yandex.Disk provides convenient access to all of your sent and received mail attachments. You can search for documents by type or email address in the “Mail” section of the Yandex.Disk web interface.

If you haven’t yet used Yandex.Mail, you can set up a mail importer to import mail from your current mail account to your Yandex account connected to Disk.

FAQ

How much does Yandex.Disk cost?

Nothing. Yandex.Disk is a completely free service.

How much storage do I have?

You'll start off with 3 GB of storage, which can then be instantly increased to 10 GB.

Where are my files stored?

All the files you move or copy to the "Yandex.Disk" folder are uploaded to Yandex servers. Copies of these files are also stored locally on your computer. The "Yandex.Disk" folder on your computer is a sync point for our servers.

How long are they stored for?

Until you delete them. We impose no restrictions on storage time.

How secure are my files on Yandex.Disk?

Completely. Your Disk is protected by the latest technology and all information transferred is securely encrypted. All files stored on Yandex.Disk are scanned with the Dr Web antivirus. Furthermore, no matter what happens to your computer or telephone, all your files on Yandex.Disk will be completely safe.
